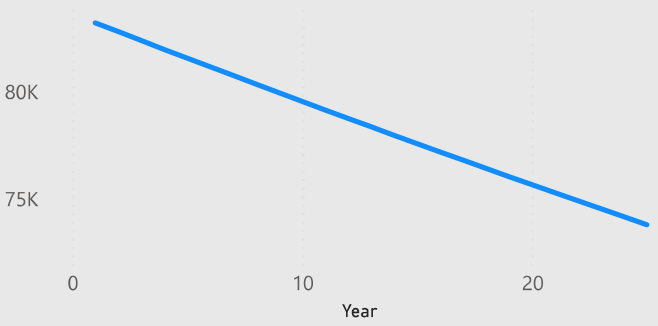
Solar Project Investment Dashboard

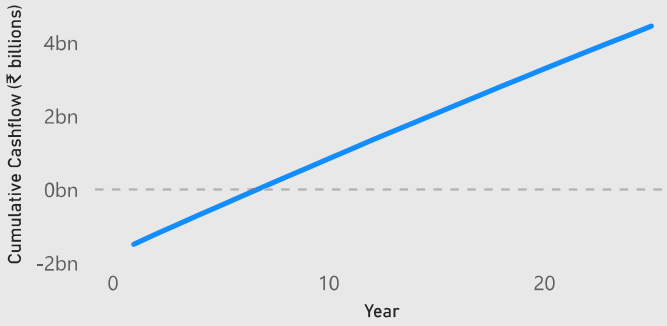
50 MW Utility Scale Solar PV – Financial Evaluation

NPV (₹ Millions)	Project IRR (%)	Payback (Years)	LCOE (₹/kWh)	Lifetime CO_2 Avoided (tons)
560M	14.11	7	2.73	1.76M

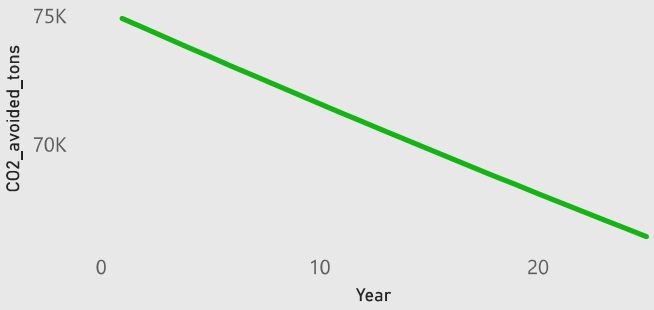
Energy Generation (MWh)



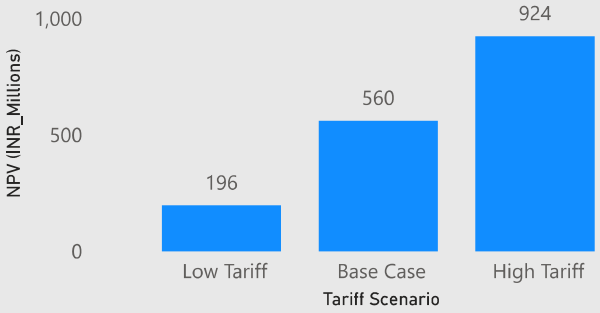
Cumulative Cashflow (₹ billions)



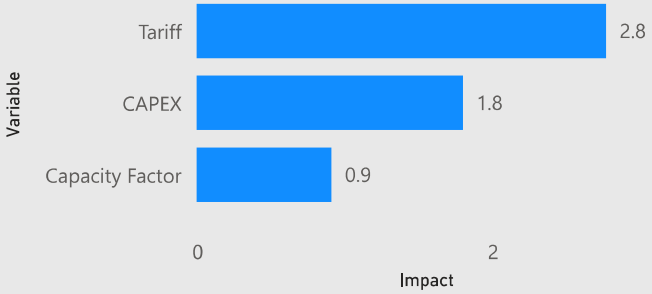
Annual CO_2 Avoided (tons)



NPV vs Tariff Scenarios



IRR Sensitivity Drivers



Investment Summary

- Project delivers positive NPV and IRR above hurdle rate.
- LCOE below tariff indicates strong economics.
- Tariff and capacity factor are primary risk drivers.
- Project remains viable under downside scenarios.
